

Specification comparison

FXII Plus series CG-75/130/160FXII Plus

High-end model

Excellent in preciseness, speed, and usability.
The new Plus model has a new function of ID Cut which enables efficient production with automated process.

CG-SR III Series CG-60/100/130SR III

Low-cost model

Stable cutting performance with Mimaki's core technologies. The maximum cutting pressure of 500g and fast through put in curve cutting are achieved.

Low cost model with High performance is achieved.

	Mimaki	
Model	CG-75/130/160FXII Plus	CG-60/100/130SR III
Max Media Width	1040 / 1580 / 1880	740 / 1250 / 1550
Max speed*	100cm/s	70cm/s
Max acceleration*	4.5G	1.5G
Max cutting pressure	500g	500g
Effective repeatability	Max cut width x 10m	Max cut width x 2m
Repeatability	0.2mm/2m	0.2mm/2m
ID Cut function (with Barcode)	○	×
Continuous crop mark detection	○	○
Media clamp use when detecting crop mark	○	×
Pouncing	○	×
Supported Media for Pouncing	Normal paper (Thickness 0.06 - 0.13 mm)	×
Receiver buffer size	30MB (Standard)	27MB (Standard)

*Max speed may differ by the cutting conditions such as media, blade, etc.

*Acceleration is the rate of change of speed per fixed time, and indicates how much the speed increases per second.
